

Series BG350

adjustable inflatable header dock seal

BLUE GIANT®

Designed for 8' x 8' (2438mm x 2438mm) door openings, the BG350 series adjustable inflatable header dock seal employs a resilient vertical air bag construction to protect building walls and increase the contact area against the trailer.

Benefits

- SAVE hundreds of dollars in reduced energy costs
- IMPROVE working conditions by keeping dust, dirt, debris and insects out
- PROTECT product and personnel from harsh weather conditions
- INCREASE productivity by providing a safe and comfortable working environment
- DURABLE range of Hi-Performance fabrics to choose from
- CUSTOM sizes available

Standard Size Specifications

Generally designed to suit 8' wide x 8' (2438mm x 2438mm) high openings.

The BG350 series service a large variety of trailer heights. This unit minimizes pressure against the building wall from an incoming trailer as the unit is inflated after the trailer had docked.

A unique internal baffle system in the vertical air bags creates a square faced design that increases the contact area against the back of the trailer. An internal retraction spring allows the header air bag to be fully retracted when not in use to prevent damage from incoming trailers.

adjustable inflatable header dock seal

Blue Giant offers a wide variety of custom inflatables to satisfy your dock requirements.

- Square faced design creates larger contact area against truck
- Pressure treated non-rot wood framing
