

## **BG900 RAIN SHROUD**

### **SPECIFICATIONS:**

Rain Shroud shall be series BG900 as manufactured by Blue Giant, Brampton, ON. Dock shelter shall be manufactured to fit door size standard door size of 120" wide x 120" high (3048mm x 3048mm). Designed to seal trailer heights ranging from 156" to 162" (3960mm to 4112mm). Unit shall consist of header frame assembly w/foam pad, one storage curtain w/trim angle and two galvanized side support mounting brackets. Minimum unit mounting height is 180" (4569mm) from grade.

### **FOAM CORE:**

Polyurethane dual density foam core with 99% memory unaffected by moisture heat or cold, maintaining flexibility at -40C. The foam core shall be continuously bonded to the pressure-treated lumber (includes UV translucent sheeting) with a high quality adhesive.

### **COVER MATERIAL:**

Cover material shall be a polyester base with a 40oz (1.13kg) Hi-Tear Vinyl finished weight covered by a second layer of 40oz (1.12kg) Hi-Tear Vinyl on front impact area of pad for a total of 80oz of protection.

### **FLAP MATERIAL:**

Foam pad shall have 40oz (1.13) Hi-Tear Vinyl protective flaps on contact area of each side of unit with a minimum 6" exposure.

### **STORAGE CURTAIN:**

Storage curtain shall have a 24" (610mm) drop and 120" (3050mm) width and made from 22oz Hi-Tear Vinyl. Storage curtain must be three sided and have special gussets on each side to prevent air gaps when truck is backed up into Rain Shroud.

### **HEAD FRAME:**

Head frame shall be made with pressure treated non-rot wood covered with polyethylene sheeting with UV inhibitors to prevent cracking and fading in sunlight.

### **MOUNTING HARDWARE:**

All mounting hardware included shall be galvanized (manufacturer's standard).

### **WARRANTY:**

Warranties are subject to standard limitations on liability. Please consult Blue Giant warranties at <http://www.BlueGiant.com> for full details on warranty information and product registration.
